**In the Specification**

Amend paragraph 19 on page 6 as follows:

A

Referring to Fig. 1, an overview diagram of a reporting system is shown which includes a plurality of user stations 10 such as User A, User B through User Z. These user stations 10 represent any number of users on a network at any time. The user stations 10 are connected to an Intranet server 12. This can be through direct communication, a local area network, or from another network like an intranet or the Internet. It may also include user stations 10 connected via a variety of other networking connections, including wireless connections. The ~~Internet~~ Intranet server 12 is in communication with database 14, which may be on another computer network. The Intranet server 12 is also communicatively connected to a mainframe/processing section 16. The Mainframe/ Processing section 16 processes data from database 14 based on user requests and completes various reports and provides the reports to the user stations 10.
